

International Value Equity

QUARTERLY UPDATE AS OF SEPTEMBER 30, 2021

Investment Objective

Long-term total return \geq MSCI EAFE Value index plus 200 bps

Volatility Objective

Target volatility \leq MSCI EAFE Value

Strategy Summary

River Road's International Value Equity (IVE) Strategy seeks to provide long-term capital appreciation by investing primarily in non-U.S. companies.

The Strategy seeks to invest in high quality companies with improving fundamentals, trading at attractive valuations. Typical investment criteria include a minimum market cap of \$3 B and average daily liquidity of \$5 MM (including both ADR and local market liquidity).

The stock selection process is complemented by a risk averse approach that employs balanced diversification and a structured sell discipline.

Past performance is no guarantee of future results. There is a risk that invested capital may be lost. Performance is shown gross and net of fees. Inception date: June 1, 2019. ¹June 1, 2019 through December 31, 2019. Out/underperformance compares the gross Composite and index. Index data source: MSCI Inc. Please see reverse side for important disclosure information.

Market Highlights

- Global equity markets retreated in Q3 driven by a flood of negative news.
- Emerging markets dramatically underperformed developed international markets and the U.S. as Chinese equities sold off on regulatory crackdowns and trouble in the real estate sector.
- Developed international markets underperformed the U.S. due to weakness within Asia-Pacific (ex Japan).
- Global economic growth decelerated in Q3 but remains in expansion territory.
- High quality and low beta underperformed in Q3.

Portfolio Highlights

- The River Road International Value Equity (IVE) Composite returned **-2.84%** (-3.03% net) for Q3 versus **-0.81%** for the MSCI EAFE Value benchmark, mainly due to **significant headwinds for low beta and high quality stocks**.
- The **United Kingdom** and **Europe (ex UK)** had the lowest contribution to relative return, while the **Middle East** and **North America** had the highest.
- Financials** and **Health Care** had the lowest contribution to relative return, while **Materials** and **Consumer Discretionary** had the highest.
- The holding with the highest contribution to Portfolio return in Q3 was **Sony Group Corp. (6758-JP)**. The holding with the lowest contribution to Portfolio return was **Ping An Insurance (Group) Co. of China Ltd. (CI H) (2318-HK)**.

Outlook

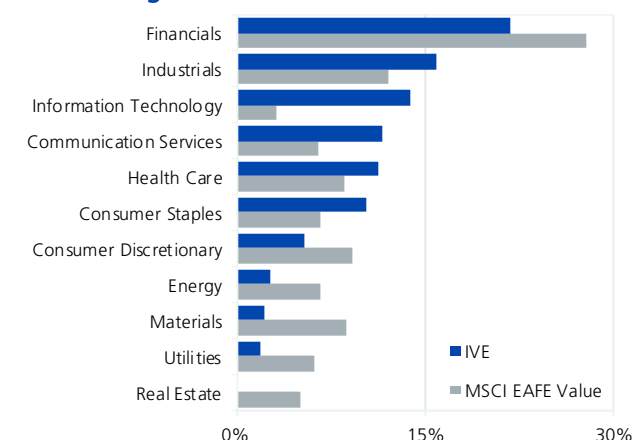

- Against the backdrop of an uncertain global economic outlook, we believe **international equities continue to offer attractive valuations and potentially stronger corporate earnings growth relative to the United States**.

Past performance is no guarantee of future results. There is a risk that invested capital may be lost. Region and sector breakdowns reflect percent of total portfolio. Region classifications are determined by River Road; underlying country classifications are primarily determined by MSCI; stocks not classified by this methodology are not presented. Sector classifications provided from GICS; stocks not classified by this methodology are not presented. ¹EBITDA excludes banks, thrifts, and insurers. ²Estimates based on ordinary shares for all ADR securities held. ³Gross of fees; indicated yield does not anticipate special dividends. ⁴Average turnover since inception (June 1, 2019). Dollar turnover, the lesser of purchases or sales as a percentage of the average market value, is presented as an average of portfolios in the Composite. Index data source: MSCI Inc.

Representative Portfolios: Performance data is based on the Composite; all other data presented is based on a representative portfolio. If no single representative portfolio is available to represent the Strategy since inception, different representative portfolios and/or the composite are used for different periods to create a continuous representative portfolio. The representative portfolio is selected by the firm as a representative account that is deemed to best represent this management style using a pre-defined, objective set of criteria. All representative portfolio data is shown as supplemental information to the Composite presentation. Each client portfolio is individually managed and may vary from the information shown for the representative portfolio.

Portfolio contribution calculated gross of fees for the Q3 2021 period. For the purpose of assessing top and bottom contributors, the contribution of child securities is aggregated with that of the parent for corporate actions that occurred during the most recent calendar quarter. The holdings identified do not represent all of the securities purchased, sold, or recommended. To receive information regarding the methodology for calculating the top/bottom contributors or a list showing every holding's contribution to the overall Composite and/or representative portfolio performance contact RRAMCompliance@riverroadam.com. Past performance is no guarantee of future results.

River Road Asset Management, LLC ("RRAM") is a registered investment adviser formed in April 2005 and is majority owned by Affiliated Managers Group, Inc. Registration of an investment adviser does not imply a certain level of skill or training. This presentation may be presented by an employee of Affiliated Managers Group, Inc., AMG Funds, or another AMG entity, which are affiliates of RRAM. RRAM claims compliance with the Global Investment Performance Standards (GIPS®). A GIPS Report is available upon request by contacting RRAMCompliance@riverroadam.com. The International Value Equity Composite contains a fully discretionary account that seeks capital appreciation by investing primarily in non-U.S. equity and equity equivalents that trade at a discount to valuation. The Composite may also be invested in ADRs. The official benchmark for the Composite is the MSCI EAFE Value index. The MSCI EAFE Value Index captures large and mid cap securities exhibiting overall value style characteristics across Developed Markets countries including Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland and the UK. The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield. Gross total return indexes reinvest as much as possible of a company's dividend distributions. The reinvested amount is equal to the total dividend amount distributed to persons residing in the country of the dividend-paying company. Gross total return indexes do not, however, include any tax credits. Composite performance may differ materially from the index as the investment universe for the composite and the index are different. All other indices are shown for additional information only. Net of fee performance is calculated using actual management fees. For periods including non-fee paying accounts, net was calculated for those accounts by applying the highest fee schedule effective at that time. Unless otherwise noted, performance provided for periods greater than one year is annualized.

The information provided in this report should not be considered a recommendation to purchase or sell any particular security. There is no assurance that any securities discussed herein will remain in our portfolio at the time you receive this report or that securities sold have not been repurchased. Characteristics and sector weightings of our portfolio are shown and may not be indicative of this strategy's current or future investments. It should not be assumed that any of the holdings discussed herein were or will be profitable or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein. This information is shown as supplemental information only and complements the full disclosure presentation.

Sector, Industry Group, Industry, or Sub-industry group levels are determined at the beginning of each month according to the Global Industry Classification Standard ("GICS"), developed and exclusively owned by MSCI Inc. ("MSCI") and Standard & Poor's Financial Services LLC ("S&P"), unless otherwise stated that they have been reclassified or classified by RRAM. Reclassifications/classifications by RRAM are not supported by S&P or MSCI. All GICS data is provided "As Is" with no warranties. RRAM may classify securities that are not automatically classified by MSCI and S&P.

Unless otherwise noted, share-related characteristics are provided by FactSet. Portfolio and index characteristics are based on companies' most recent filings as of this report date (values for many companies may be as of the prior period). Most company share-related characteristics exclude outliers. Outlier exclusion methods include interquartile and inverse interquartile; the universe for determining outliers is the iShares MSCI ACWI ETF. For more information, please contact RRAM.

MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indexes or any securities or financial products. This report is not approved, endorsed, reviewed or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.
