

# Mid Cap Value

QUARTERLY UPDATE AS OF MARCH 31, 2022

FOR PROFESSIONAL INVESTORS ONLY

## Investment Objective(s)

- Long-term total return > Russell Midcap Value index plus 200 to 400 bps
- Target volatility < Russell Midcap Value

## Strategy Summary

River Road's Mid Cap Value (MCV) Strategy utilizes a fundamentally driven research process to identify attractive purchase candidates from a universe of mid cap stocks. The Strategy seeks to invest in well-managed, financially strong companies that are trading at meaningful discounts to our assessed valuations. We further target companies with predictable and sustainable business models that are undiscovered or underfollowed by traditional Wall Street research firms. Our stock selection process is complemented by a risk averse approach that employs both balanced diversification and a structured sell discipline.

- Bottom-up, fundamentally driven stock selection
- Balanced diversification
- Structured sell discipline

## Market Highlights

- It was a great quarter for commodities, but not so great for stocks as the Russian invasion of Ukraine exacerbated global supply chain challenges and soaring inflation.
- Small caps lagged large caps throughout the quarter, while value outperformed across all market caps.
- Within the Russell Midcap Value index, **Energy (+40.98%)** and **Consumer Staples (+7.70%)** posted the highest total returns, while **Consumer Discretionary (-12.89%)** and **Information Technology (-9.46%)** posted the lowest.
- Despite struggling in March, an impressive **72% of active mid cap value managers outperformed in Q1**.

## Portfolio Highlights

- For Q1, the Mid Cap Value Composite returned **-3.43%** (-3.51% net) versus **-1.82%** for the Russell Midcap Value benchmark.
- The sectors with the highest contribution to relative return in Q1 were **Industrials** and **Information Technology**.
- The holdings with the highest contribution to active return were **McKesson Corp. (MCK)** and **Devon Energy Corp. (DVN)**.
- The sectors with the lowest contribution to relative return in Q1 were **Consumer Discretionary** and **Financials**.
- The holdings with the lowest contribution to active return were **KKR & Co. Inc. (KKR)** and **LKQ Corp. (LKQ)**.

## Outlook

- We believe **high-quality and value-oriented stocks remain relatively well positioned** but have become **increasingly cautious given surging inflation and interest rates**.

**Past performance is no guarantee of future results. There is a risk that invested capital may be lost.** GICS sector breakdown reflects percent of total portfolio; stocks without a reported sector are not presented. <sup>1</sup>EBITDA excludes banks, thrifts, and insurers. <sup>2</sup>Price/earnings excludes negative earnings. <sup>3</sup>Estimates based on ordinary shares for all ADR securities held. <sup>4</sup>Average calendar year turnover since inception (January 1, 2021). Dollar turnover, the lesser of purchases or sales as a percentage of the average market value, is presented as an average of all portfolios in the Composite. If one portfolio is not in the Composite for the entire period, turnover is the average annualized turnover of all portfolios in the Composite at the end of the period. **Representative Portfolios:** Unless otherwise noted as Composite, the information presented is based on a representative portfolio. If no single representative portfolio is available to represent the Strategy since inception, different representative portfolios and/or the composite are used for different periods to create a continuous representative portfolio. The representative portfolio is selected by the firm as a representative account that is deemed to best represent this management style using a pre-defined, objective set of criteria. All representative portfolio data is shown as supplemental information to the Composite presentation. Each client portfolio is individually managed and may vary from the information shown for the representative portfolio.

Top and bottom contributors are calculated gross of fees for the most recent quarter and based on portfolio contribution to active return, which is calculated as the portfolio-weighted return relative to the overall index. For the purpose of assessing top and bottom contributors, the contribution of child securities is aggregated with that of the parent for corporate actions that occurred during the most recent calendar quarter. The holdings identified do not represent all of the securities purchased, sold, or recommended. To receive information regarding the methodology for calculating the top/bottom contributors or a list showing every holding's contribution to the overall Composite and/or representative portfolio performance contact RRAMCompliance@riverroadam.com.

The Mid Cap Value Composite contains a fully discretionary mid cap value equity account that seeks capital appreciation by investing primarily in mid cap value domestic equity securities that trade at a discount to our valuation as determined using RRAM's proprietary Absolute Value® approach. For this Composite, RRAM defines a mid cap company as one whose market capitalization is less than \$35 B at the time of initial purchase. RRAM selects securities from a universe of companies with a market capitalization at the time of initial purchase typically between \$2 B and \$35 B, employing a value driven, bottom-up fundamental approach. The official benchmark for the Composite is the Russell Midcap® Value index. All other indices are shown for additional information only. The U.S. dollar is the currency used to express performance and includes the reinvestment of income. Composite performance is presented gross of foreign withholding taxes on dividends, interest income, and capital gains. All Composite performance is after the deduction of trading costs. Net of fee performance is calculated using actual management fees. For periods including non-fee paying accounts, net was calculated for those accounts by applying the highest fee schedule effective at that time.

The information provided in this report should not be considered a recommendation to purchase or sell any particular security. There is no assurance that any securities discussed herein will remain in our portfolio at the time you receive this report or that securities sold have not been repurchased. Characteristics and sector weightings of our portfolio are shown and may not be indicative of this strategy's current or future investments. It should not be assumed that any of the holdings discussed herein were or will be profitable or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein. Sector, Industry Group, Industry, or Sub-industry group levels are determined at the beginning of each quarter according to the Global Industry Classification Standard ("GICS"), developed and exclusively owned by MSCI, Inc. ("MSCI") and Standard & Poor's Financial Services LLC ("S&P"), unless otherwise stated that they have been reclassified or classified by RRAM. Reclassifications/classifications by RRAM are not supported by S&P or MSCI. All GICS data is provided "As Is" with no warranties. RRAM may classify securities that are not automatically classified by MSCI and S&P.

Unless otherwise noted, share-related characteristics are provided by FactSet. Portfolio and index characteristics are based on companies' most recent filings as of this report date (values for many companies may be as of the prior period). Most company share-related characteristics exclude outliers. Outlier exclusion methods include interquartile and inverse interquartile; the universe for determining outliers is the Russell 3000.
