

Dividend All-Cap Value ex-MLP

A TOTAL RETURN STRATEGY | QUARTERLY UPDATE AS OF DECEMBER 31, 2022

FOR PROFESSIONAL INVESTORS ONLY

Investment Objectives

- Long-term total return > Russell 3000 Value index plus 200 to 400 bps
- Target yield \geq 150% of the Russell 3000 Value
- Long-term volatility < Russell 3000 Value

Strategy Summary

River Road's Dividend All-Cap Value ex-MLP (DAV ex-MLP) Strategy utilizes a fundamentally driven research process to identify attractive purchase candidates from an all cap universe of equity securities with attractive dividend yields. The Strategy seeks to invest in well-managed, financially strong companies with high and growing dividends, targeting companies that are also trading at meaningful discounts to our assessed valuations. Typical investment criteria include:

- Minimum market cap of \$700 MM at the time of initial purchase
- Indicated dividend yield > 0%; prefer > 2%

The stock selection process is complemented by a risk averse approach that employs balanced diversification and a structured sell discipline.

Past performance is no guarantee of future results. There is a risk that invested capital may be lost. Performance is shown gross and net of fees. Inception date: September 1, 2011. ¹Gross of fees; indicated portfolio yield does not anticipate special dividends. Index data source: London Stock Exchange Group PLC and its group undertakings (collectively, the "LSE Group"), © LSE Group. Please see reverse side for important disclosure information.

Market Highlights

- Inflationary pressure ebbed as the initial impacts of the Federal Reserve's 2022 tightening campaign started to land.
- Growth stocks and bonds both had a historically bad year; value had its best year since the internet bubble popped in 2000.
- Dividend payers sharply outperformed non-payers in Q4 and 2022.

Portfolio Highlights

- The Dividend All-Cap Value ex-MLP (DAV ex-MLP) Composite returned **+11.01%** (**+10.93%** net) for Q4 versus **+12.18%** for the Russell 3000 Value. For 2022, the Composite returned **-4.10%** (**-4.42%** net) versus **-7.98%** for the benchmark.
- The Portfolio **underperformed in Q4 as the U.S. equity market advanced sharply** as the strength of cheaper, higher yielding stocks was offset in part by the outperformance of more volatile issues.
- At the end of Q4, the dividend yield of the Portfolio was **3.29%**, which is **145% of the 2.27% yield of the Russell 3000 Value** and **almost double the 1.76% yield of the S&P 500**.
- The sector with the highest contribution to relative return (total effect) in Q4 was **Communication Services**; for 2022, it was **Financials**.
- The holding with the highest contribution to active return in Q4 was **Oracle Corp. (ORCL)**; for 2022, the top contributor was **Marathon Petroleum Corp. (MPC)**.
- The sector with the lowest contribution to relative return (total effect) in Q4 was **Financials**; for 2022, it was **Energy**.
- The holding with the lowest contribution to active return in Q4 was **M&T Bank Corp. (MTB)**; for 2022, the bottom contributor was **Target Corp. (TGT)**.

Outlook

- We increasingly believe that December 2021 marked the beginning of a new, more sober, value-oriented regime for markets as rising rates and political strife drive investors from the promise of growth to the certainty of value, and particularly dividends, in the years to come.

Past performance is no guarantee of future results. There is a risk that invested capital may be lost. GICS sector and market cap breakdowns reflect percent of total portfolio; stocks without a reported sector or market cap (e.g. corporate reorganizations, mergers, acquisitions, and dissolutions) are not presented. Market caps are live data points and subject to change. ¹Gross of fees; indicated yield does not anticipate special dividends. ²EBITDA excludes banks, thrifts, and insurers. ³Estimates based on ordinary shares for all ADR securities held. ⁴Risk characteristics based on trailing 60-month gross of fee composite performance. ⁵Average calendar year turnover. Dollar turnover, the lesser of purchases or sales as a percentage of the average market value, is presented as an average of all portfolios in the Composite. If one portfolio is not in the Composite for the entire period, turnover is the average annualized turnover of all portfolios in the Composite at the end of the period. Index data source: London Stock Exchange Group PLC and its group undertakings (collectively, the "LSE Group"), © LSE Group.

Top and bottom contributors are calculated gross of fees for the most recent quarter and based on portfolio contribution to active return, which is calculated as the portfolio-weighted return relative to the overall index. For the purpose of assessing top and bottom contributors, the contribution of child securities is aggregated with that of the parent for corporate actions that occurred during the most recent calendar quarter. The holdings identified do not represent all of the securities purchased, sold, or recommended. To receive information regarding the methodology for calculating the top/bottom contributors or a list showing every holding's contribution to the overall Composite and/or representative portfolio performance contact RRAMCompliance@riverroadam.com. Past performance is no guarantee of future results.

River Road Asset Management, LLC ("RRAM") claims compliance with the Global Investment Performance Standards (GIPS®). A GIPS Report is available upon request by contacting RRAMCompliance@riverroadam.com. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The Dividend All-Cap Value ex-MLP Composite contains fully discretionary equity income accounts that seek long-term capital appreciation and high current income by investing primarily in a diversified, all-cap basket of income producing equity securities that trade at a discount to our valuation as determined using RRAM's proprietary Absolute Value® approach. The composite is primarily invested in dividend paying common stocks. The composite may also be invested in a broad range of foreign stocks, convertible preferred stocks, Real Estate Investment Trusts ("REITs"), investment companies, LLCs, and royalty income trusts. The composite excludes any accounts invested in the Dividend All Cap Value Strategy that allows Master Limited Partnership (MLP) investments. Some accounts in the composite restrict all Publicly Traded Partnerships (i.e. both MLPs and LLCs), but the composite does include accounts that allow(ed) LLCs. RRAM employs a value-driven, bottom-up approach. The official benchmark for the Composite is the Russell 3000 Value. All other indices are shown for additional information only. Composite performance may differ materially from the indices as the Composite only invests in a subset of the securities contained in the indices and also invests in securities not contained in the indices. The U.S. dollar is the currency used to express performance and includes the reinvestment of income. Composite performance is presented gross of foreign withholding taxes on dividends, interest income, and capital gains. All Composite performance is after the deduction of trading costs. Net of fee performance is calculated using actual management fees. Unless otherwise noted, performance provided for periods greater than one year is annualized.

The information provided in this report should not be considered a recommendation to purchase or sell any particular security. There is no assurance that any securities discussed herein will remain in our portfolio at the time you receive this report or that securities sold have not been repurchased. Characteristics and sector weightings of our portfolio are shown and may not be indicative of this strategy's current or future investments. It should not be assumed that any of the holdings discussed herein were or will be profitable or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein. This information is shown as supplemental information only and complements the full disclosure presentation.

Sector, Industry Group, Industry, or Sub-industry group levels are determined at the beginning of each month according to the Global Industry Classification Standard ("GICS"), developed and exclusively owned by MSCI Inc. ("MSCI") and Standard & Poor's Financial Services LLC ("S&P"), unless otherwise stated that they have been reclassified or classified by RRAM. Reclassifications/classifications by RRAM are not supported by S&P or MSCI. All GICS data is provided "As Is" with no warranties. RRAM may classify securities that are not automatically classified by MSCI and S&P.

Unless otherwise noted, share-related characteristics are provided by FactSet. Portfolio and index characteristics are based on companies' most recent filings as of this report date (values for many companies may be as of the prior period). Most company share-related characteristics exclude outliers. Outlier exclusion methods include interquartile and inverse interquartile; the universe for determining outliers is the Russell 3000. For more information, please contact RRAM.
